DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randi L. Karpinia on 09-01-04.

The application has been amended as follows:

Claims 13-17 have been canceled.

Allowable Subject Matter

2. Claims 1-12,18-27 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter: Regarding claim 1 the most relevant prior art of record Suguro et al (6150984) and Kudoh (6295462) teach a wireless information device within a wireless information communication system for receiving and processing a message, the wireless information device comprising: an antenna system having a plurality of antennas for receiving the message; a radio frequency switch coupled to the antenna system for activating a first antenna of the plurality of antennas as an active antenna in response to a first antenna control signal; a transceiver coupled to the radio frequency switch for receiving the message from the antenna system through the radio frequency switch,

and further for sending a signal to the antenna system in response to a command; a controller coupled to the radio frequency switch and to the transceiver for processing the message and further for sending the first antenna control signal to the radio frequency switch and further for sending the command to the transceiver; a memory coupled to the controller for storing the message; and a display coupled to the controller for displaying the message in response to a display command from the controller, wherein the display includes a first display orientation. Claim 1-12,18-27 are allowable over the prior art of record since the cited references taken individually or in combination (in view of Applicant Remarks/in the amendment) fails to teach further wherein the controller to receive the first display orientation, and adapted to generate the first antenna control signal, wherein the first antenna control signal is determined with the first display orientation, in combination with other the limitations of claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should clearly be labeled "Comments on Statement of Reasons for Allowance."
